

Enovations Consultancy FZC

Enovations Consultancy FZC (EC) is a leading Business Intelligence (BI) consulting and professional services organization established in United Arab Emirates (UAE), which helps its clients to achieve superior performance by fully realizing the business potential of BI technology and improve their business processes through effective information management.

The company has been offering high quality Business intelligence solutions in a cost effective manner to a discerning clientele. Key to our success is our full project life-cycle methodology, reflecting our years of experience and recognized best practices. We combine business and technical excellence, expertise with best-of-breed technology, and industry-specific experience to meet and exceed our customers' expectations.

We offer and support the entire suite of Business Objects technologies. Our superior product knowledge and extensive implementation experience make Enovations the obvious choice for your Business Objects and business intelligence initiatives. Most ordinary consulting organizations support many lines of business and represent multiple technologies. However, our primary business is implementing business intelligence solutions utilizing only Business Objects technologies.

Business Intelligence Focus

We provide business intelligence software solutions, consulting services, and training that make it possible for our customers to achieve their strategic visions. We develop systems that enable our customers to solve business problems and improve the long-term health of their organizations by allowing them to monitor key metrics, measure performance, manage operations, and assess how day-to-day activities align with their strategic visions.

Many consultancies have multiple practices and partnerships with several software vendors. We believe it's better to be exceptional at one thing than good at many things. We focus exclusively on the design and development of business intelligence systems with products from Business Objects. Business Objects is the global leader in business intelligence and offers a comprehensive suite of products on a single platform.

Enovations System Intelligence Private Limited-India (www.enovations.in), is the only Authorized SAP Education Partner for SAP-BusinessObjects in India, who cater to the needs of Corporate specializing on SAP-Business Objects. With over 10 years of teaching experience we are confident you will be delighted with the quality of our training services. We can offer a full range of SAP Business Objects training services for corporate that include *Administration, Business Intelligence, Data Services, Financial Performance Management modules and tools*

Effective & Actionable BI solutions : Enovations consultants' collective years of experience can help you define an actionable BI strategy, tailor-made for your business needs. We adhere to proven process methodologies for every project as part of our overall project management discipline.

Business Objects Services

- 1. Full Life-Cycle Project Management**
- 2. Migration Services**
- 3. Crystal Reporting**
- 4. Consulting, Support, and Development**
- 5. Training and Knowledge Transfer**

Our Commitment

Business Intelligence (BI) allows organizations to gain access to, explore and communicate information throughout all levels internally and externally with customers and business partners. Facilitating accurate and timely information across the enterprise allows for better business decisions.

Your BI initiative demands the best-in-class. Because it's your BI infra-structure that provides insight into the past performance as well as the future opportunities. So, we commit our best qualified and the most experienced skills to the success of your BI initiatives.

The People

The founders have rich experience in implementing and supporting ERP & Business Intelligence solutions over a decade in the Region and are proud to have a client base with some established names amongst its customers in all the domains which are detailed with some case studies.

Enovations continually seeks and recruits highly experienced developers, architects, analysts, quality assurance professionals and project managers with broad industry and technology experience. We are able to tap into this knowledge/skill/experience base to provide services and solutions to meet the needs of customers from a variety of industries.

Customer Focus

Enovations views each customer as a partnership and a customer's success is a key to our own success. Our business is built on long-term relationships. So, we aim to provide solutions that are flexible enough to allow an organization to grow, and as it grows provide additional solutions where needed. Our consultants and project managers will keep you up to date to ensure they are working on the right priorities through daily and weekly status reports. Our consultants will continuously ask for feedback to make sure they are meeting your requirements and expectations. We regularly gather feedback on our performance during projects. After we complete projects, we learn how we can improve through customer surveys and post project reviews.

Business Objects Full Life-Cycle Project Management

Managing your whole solution : from vision to value

Our true value is demonstrated when we are engaged in the delivery of a complete solution. We combine our own skills and resources with the chosen technology key components such as enterprise reporting, dashboards, query and analysis tools and data integration, to create a solution that turns business data into a corporate asset.

Enovations consultants will evaluate your current technology configuration, dynamic business needs and time constraints when customizing your business intelligence plan. In our phased approach to providing BI implementation services, we will:

- Assess the scope of your business intelligence needs
- Design a BI solution that incorporates your specific business and technical requirements
- Build a BI solution using the appropriate combination of Business Objects® products, eliminating the risk of software incompatibility and establishing a sound security environment.
- Deploy a tested and proven business intelligence solution, with the goal of quick successes and knowledge transfer for self-sufficiency
- Evolve the solution over time to enhance functionality to meet your growing business needs, while ensuring proper server capacity and upgrades to accommodate your growing data needs

We can plan, manage, design, develop and implement your business intelligence project. We can complete the entire project for you or work jointly with your staff. All our projects involve knowledge transfer with both your business and IT personnel involved in the project.

Our full life-cycle BI services include:

- Project scope & initial analysis
- Assessments and Requirements gathering
- BI Architecture and Design
- Reporting, Ad Hoc Query, Analysis, KPIs, Dashboards
- Development, Testing, and Deployment
- Production roll-out and transition
- Training and knowledge transfer
- Operational Support

Business Objects Migration Services

Enovations Consultancy is recognized by Business Objects as superior migration specialists. We bring extensive knowledge and best practices in both Crystal Reports/Crystal Enterprise and Business Objects migrations, including clients who have thousands of users and reports. Our services teams are trained and certified on migration techniques from Business Objects 4, 5 & 6 and Crystal Enterprise 7, 8, 9 & 10 to the latest version, XIR2 or XI 3.0

We at Enovations understand the constant change that our customers are faced with and keeping up with the latest versions of software can be difficult, time consuming, expensive, and at times even risky. Having been there ourselves we have developed skills and migration methods to assist our customers in getting to the version they require as quickly and smoothly as possible.

- Business Objects XI Upgrade Services
- Business Objects 6.5 Migration
- Report Migration Services
- Crystal Upgrades

Migrate to BusinessObjects XI Release 2

Still using BusinessObjects 5.x/6.x or Crystal Enterprise? Standardize on the latest version of the world's leading business intelligence (BI) platform, BusinessObjects XI Release 2. Start planning your migration now

Why migrate?

BusinessObjects 5 and 6 users get*:

- Better-than-ever query and analysis with Web Intelligence
- Support for BusinessObjects full client
- Enhanced tools for performance management
- More performance, scalability, and reliability
- Secure BI within Microsoft Office
- Support for existing user profiles and reports

Crystal Enterprise users get*:

- Lower costs with self-service ad hoc query and analysis
- World-class dashboards and scorecards for performance management
- Integrated enterprise information management
- Enhanced Microsoft Office integration
- Secure BI within Microsoft Office
- Support for existing user profiles and reports

What's Inside BusinessObjects XI?

- BusinessObjects XI is a complete suite of performance management, information management, reporting, and query and analysis tools built on BusinessObjects Enterprise XI

Crystal Reporting

Today, most organizations face a similar challenge: The information you need exists – but it's stored in disparate, inaccessible sources, in a format that's not usable. Reporting serves as a foundation for a broader BI strategy, helping you provide the most requested information – reliably, securely, and in the required format.

Crystal Reports – Connect to virtually any data source, design and format interactive reports, and share them internally and externally. Securely deliver and explore your reports via SAP BusinessObjects Enterprise, Crystal Reports Viewer, and Microsoft Office documents.

We have experienced Crystal Reports consultants who will help your company build professional looking, powerful reports that can help you run your business more efficiently and provide the Crystal Reports help that you may need. Crystal Reports is a powerful tool that even allows graphing within the reports themselves.

Crystal Reports Consulting - ERP Reporting

Enterprise information systems are designed to gather information from across your business. However they are notoriously poor at then filtering out the “noise” and providing you with the exact information you need. Your business is unique and your information needs are thus unique. Custom Crystal Reports development is a fast way to deliver information to your desk to be analyzed. Good information leads to better decision-making, which leads to efficiency and profitability.

Crystal Reports - Application Experience : We have experience developing Crystal Reports from most leading ERP and accounting applications such as Oracle EBS, Microsoft Navision, Sage and so on

Crystal Reports - Database Experience : We have experience developing Crystal Reports from the following databases: Microsoft SQL Server, Oracle, Informix , MySQL , Microsoft Access, FoxPro etc

How does a typical Crystal Reports development project work?

Step 1: The process begins with a discussion of your specific report needs. During that discussion our Crystal programmers will gather your Crystal Reports requirements, technical information about your data sources, details on how these reports are going to be delivered to end-users, and the best method to obtain access to your data sources. (VPN, terminal services, sample database, etc)

Step 2 : The output of this discussion is an estimate of the lead time & cost required to complete your reports.

Step 3 : Once we have your approval, your report will be assigned to our development team. At the end of development, our Crystal consultants will send you the Crystal Reports RPT file. We then ask you to verify the validity of the data returned in the Crystal Report by running it against your production data.

Consulting, Support, and Development Services

Project Support Services

We have a well earned reputation for providing a key supporting role to customers. Whether you are starting out on a new project, are facing unexpected problems, or are looking for additional help developing an existing solution, Enovations has the skills and services to increase the value of your investment.

We supply specialist consultants with core skills that complement your existing team, and by working in partnership with you we provide resources where they are required, for as long as you need them.

You benefit from highly accredited, experienced people, with a wealth of expertise from a range of different project implementations - each one a learning curve in its own right - skills available include:

- Crystal Report Writing
